Subject: Harco

I called Doug Zimmerman at 2:25 and told him we needed to know what the state felt about the capping option, especially since it appeared that the PRPs knew something about how our admin. order process worked and were starting to move on their own while they had no controls on them from us. He affirmed that DEP was tied up with Stratford, but that they probably would be able to turn their attention to Harco after the Stratford public meeting tonight. I told Doug that if the state had no problems with capping, we would aim for that option, and would use the fence as a fall back position. The order would be ready to go next week.

I told Doug that we would expect to hear from him next week whether or not the state could spare someone to review Harco, and stressed that we had to be well coordinated with DEP to be able to respond to the PRPs. He said he would get back to us.
